#98-14

Dear Mr. Tucker:

Tokheim Model H424B Series Balance Dispenser

This is in response to your request for California Air Resources Board (CARB) approval of the Tokheim Model H424B Series Balance Dispenser equipped with vapor recovery.

As required by the Certification Procedures for Gasoline Vapor Recovery Systems at Service Stations, the approvals of the three State agencies are a precondition to certification by the Air Resources Board. The appropriate letters of approval have been received and are listed as follows:

-Department of Food and Agriculture,
Division of Measurement Standards
October 25, 1995

-Department of Occupational Safety and Health
June 12, 1998

-Department of Forestry and Fire Protection
Office of the State Fire Marshal
June 25, 1998

The April 12, 1996, Certification and Test Procedures outline dynamic pressure drop specifications for balance systems. Certification testing was performed and successfully passed these baseline requirements. Variations of hanging hardware components can affect system dynamic pressures, and should be verified during system start-up.

I find that the use of the Tokheim Model H424B Series Balance Dispenser, when installed in accordance with the manufacturer's instructions, will not adversely affect the performance of vapor recovery systems on which they are installed. Therefore, the Tokheim Model H424B Series Balance Dispenser is certified for use with Phase II vapor recovery systems.
